Million transactions | Sending | August 2026

Key Findings | August 2026 — All Selected Sending Banks.

📉 Highest decline rate

Baroda U.P. Bank has the highest technical-decline rate among the six selected sending banks at 2.44%.

🏢 Largest transaction impact

Central Bank of India has approximately 11.19 million estimated technical declines, despite having a lower decline rate of 2.34%.

Potential improvement | 0.50% target; 50% gap closed

Our hypothetical scenario estimates 6.74 million fewer declines across the selected sending banks, including 4.40 million at Central Bank of India.

💡 Investigation priority

Start by investigating Central Bank of India's technical declines because it has the largest estimated transaction impact.

Key Findings | August 2026 — Full Dataset

🔴 Volume leader

Maharashtra leads the named states and UTs with 2.39 billion transactions.

🧭 Geographic coverage gap

44.39% of reported transaction volume is unclassified by state or UT; 55.61% is geographically classified.

💳 Highest average payments

Manipur leads at ₹1,778.76 per transaction, closely followed by Ladakh at ₹1,776.79.

💡 Analysis priority

Improve state/UT tagging to strengthen geographic analysis. Comparing activity per resident also requires population data.
